PROJECTS

JobVista — Job Search & Recruitment Platform [Java, Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, React.js, Tailwind CSS, REST API, JWT, WebSocket, Adzuna API]

GitHub • Demo

- Developed a full-stack job search and recruitment platform using Spring Boot, React.js, PostgreSQL, and REST APIs.
- Implemented JWT-based authentication and role-based access control for USER, COMPANY, and ADMIN roles.
- Built job posting, search, resume upload, company management, and application workflows using Spring Data JPA.
- Integrated the Adzuna API to fetch and display external job listings.

Hence-Code — Collaborative Online Code Editor [Java, Spring Boot, React.js, PostgreSQL, Redis, WebSocket, Yjs, Docker, Traefik, GitHub OAuth, JGit]

GitHub

- Developed a browser-based collaborative code editor with Spring Boot and React.js, supporting multiple users editing code simultaneously.
- Implemented real-time code synchronization using WebSocket and Yjs.
- Integrated GitHub OAuth for user authentication and JGit to manage Git repositories from within the application.

LogiTrack — Inventory & Sales Management System [Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, React.js, REST API, JWT]

GitHub • Demo

- Developed a full-stack inventory and sales management system with Spring Boot, React.js, and PostgreSQL to manage products, purchases, sales, invoices, and reports.
- Implemented JWT authentication and role-based access control (ADMIN/STAFF) using Spring Security and BCrypt.
- Automated business workflows with invoice generation, CSV export, email verification, and password recovery.
